Ensure that your building is safe and compliant over its lifecycle by recording information in a *structured digital format.*

Fire Stopping

Fire Doors

Project Management

Fire Dampers

Internals

Electrical

Asset Management

Windows

Water Management

Joinery

Health & Safety

Externals

Record the information using our paper-less system across two platforms (desktop & mobile app)

Upload your drawings (compartmentation, elevation, HVAC, etc) and bring them to life by dropping colour coded pins to document who completed the work, where and when it was carried out.

HOW IT WORKS

Create templates to make sure that all work recorded is clear, understandable and focused on the needs of the user.

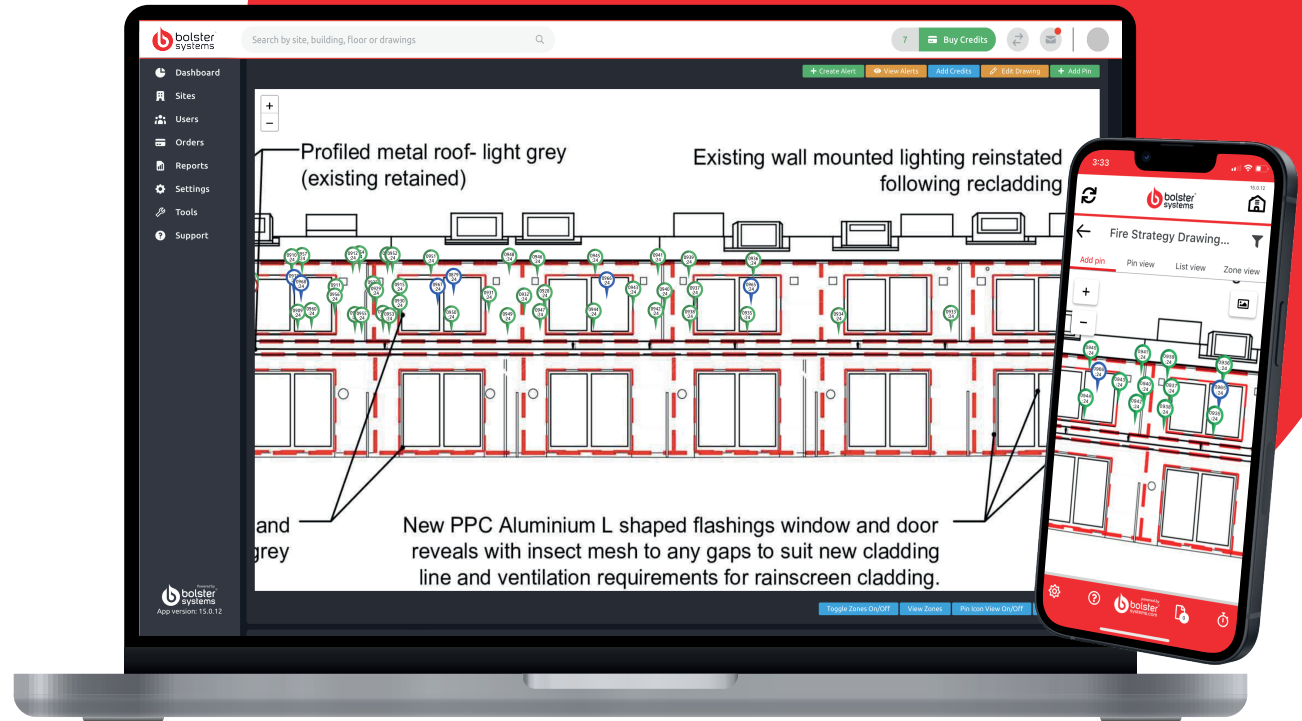

Upload drawings to our desktop site.

Use our mobile app to navigate your site and drop pins to record data using your templates, as you locate work for maintenance, remedial or installation.

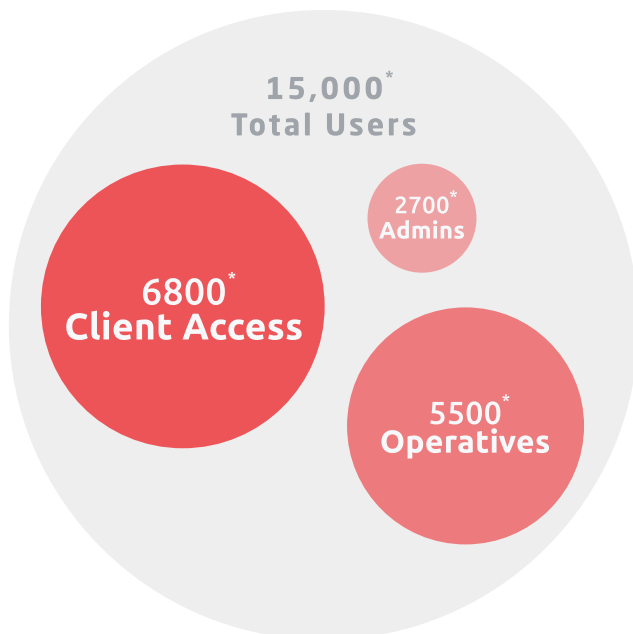

The information is stored using colour coded pins. Histories can be added to these pins as the work evolves over your buildings lifecycle.

Bolster Systems is completely cloud based and information can be viewed at any time by those with access to the drawing.

This information can also be generated into structured PDF's and CSV documents to capture relevant and proportionate information.

OUR USERS

Admins

Admins can use both the app and the desktop site to upload floor plans, documents and generate reports to supply to clients.

Operatives

Access digital floor plans via your mobile device. inspect, locate, document and manage works undertaken on site.

Clients

Clients can be granted read-only access to the desktop site, allowing them to view and generate reports on their projects with complete transparency.

The Bolster system facilitates collaborative working between duty holders, contractors and surveyors to ensure a single source of truth.

INCLUDED

Included with your subscription:

- ✓ Unlimited users, pins and reports
- ✓ Timesheets (Basic)
- ✓ Pin Tasks
- ✓ User Support
- ✓ 10 GB Document Library
- ✓ Client Access
- ✓ Company Permissions
- ✓ Costing & Estimating

Get in touch to discuss our system further and arrange a demo.
