

Bolster Systems

Installation Types Visual guide

Pin Options

- 1 Tabs
- 2 Prelims
- 3 Add Folder
- 4 Installations Folder
- 5 Filters
- 6 Enabled Slider
- 7 'Kebab' menu

1 From the same page, click on the tabs to view your Installations, Items, Ratings and Prelims.

2 Prelims is a new area, created specifically for Bolster Plus users. Prelims affect your costing cart as mentioned on the previous page (3) with either fixed rate or percentage additions or subtractions.

4 Installations table. Each row is a folder that contains your installation type pin options that will output to a template when added to a site. Click to enter your folder and add installation types.

Any Bolster Systems default installation types will be in this folder named 'System Defaults'. Installation Types you have created previously will be in a folder named 'Company Created'.

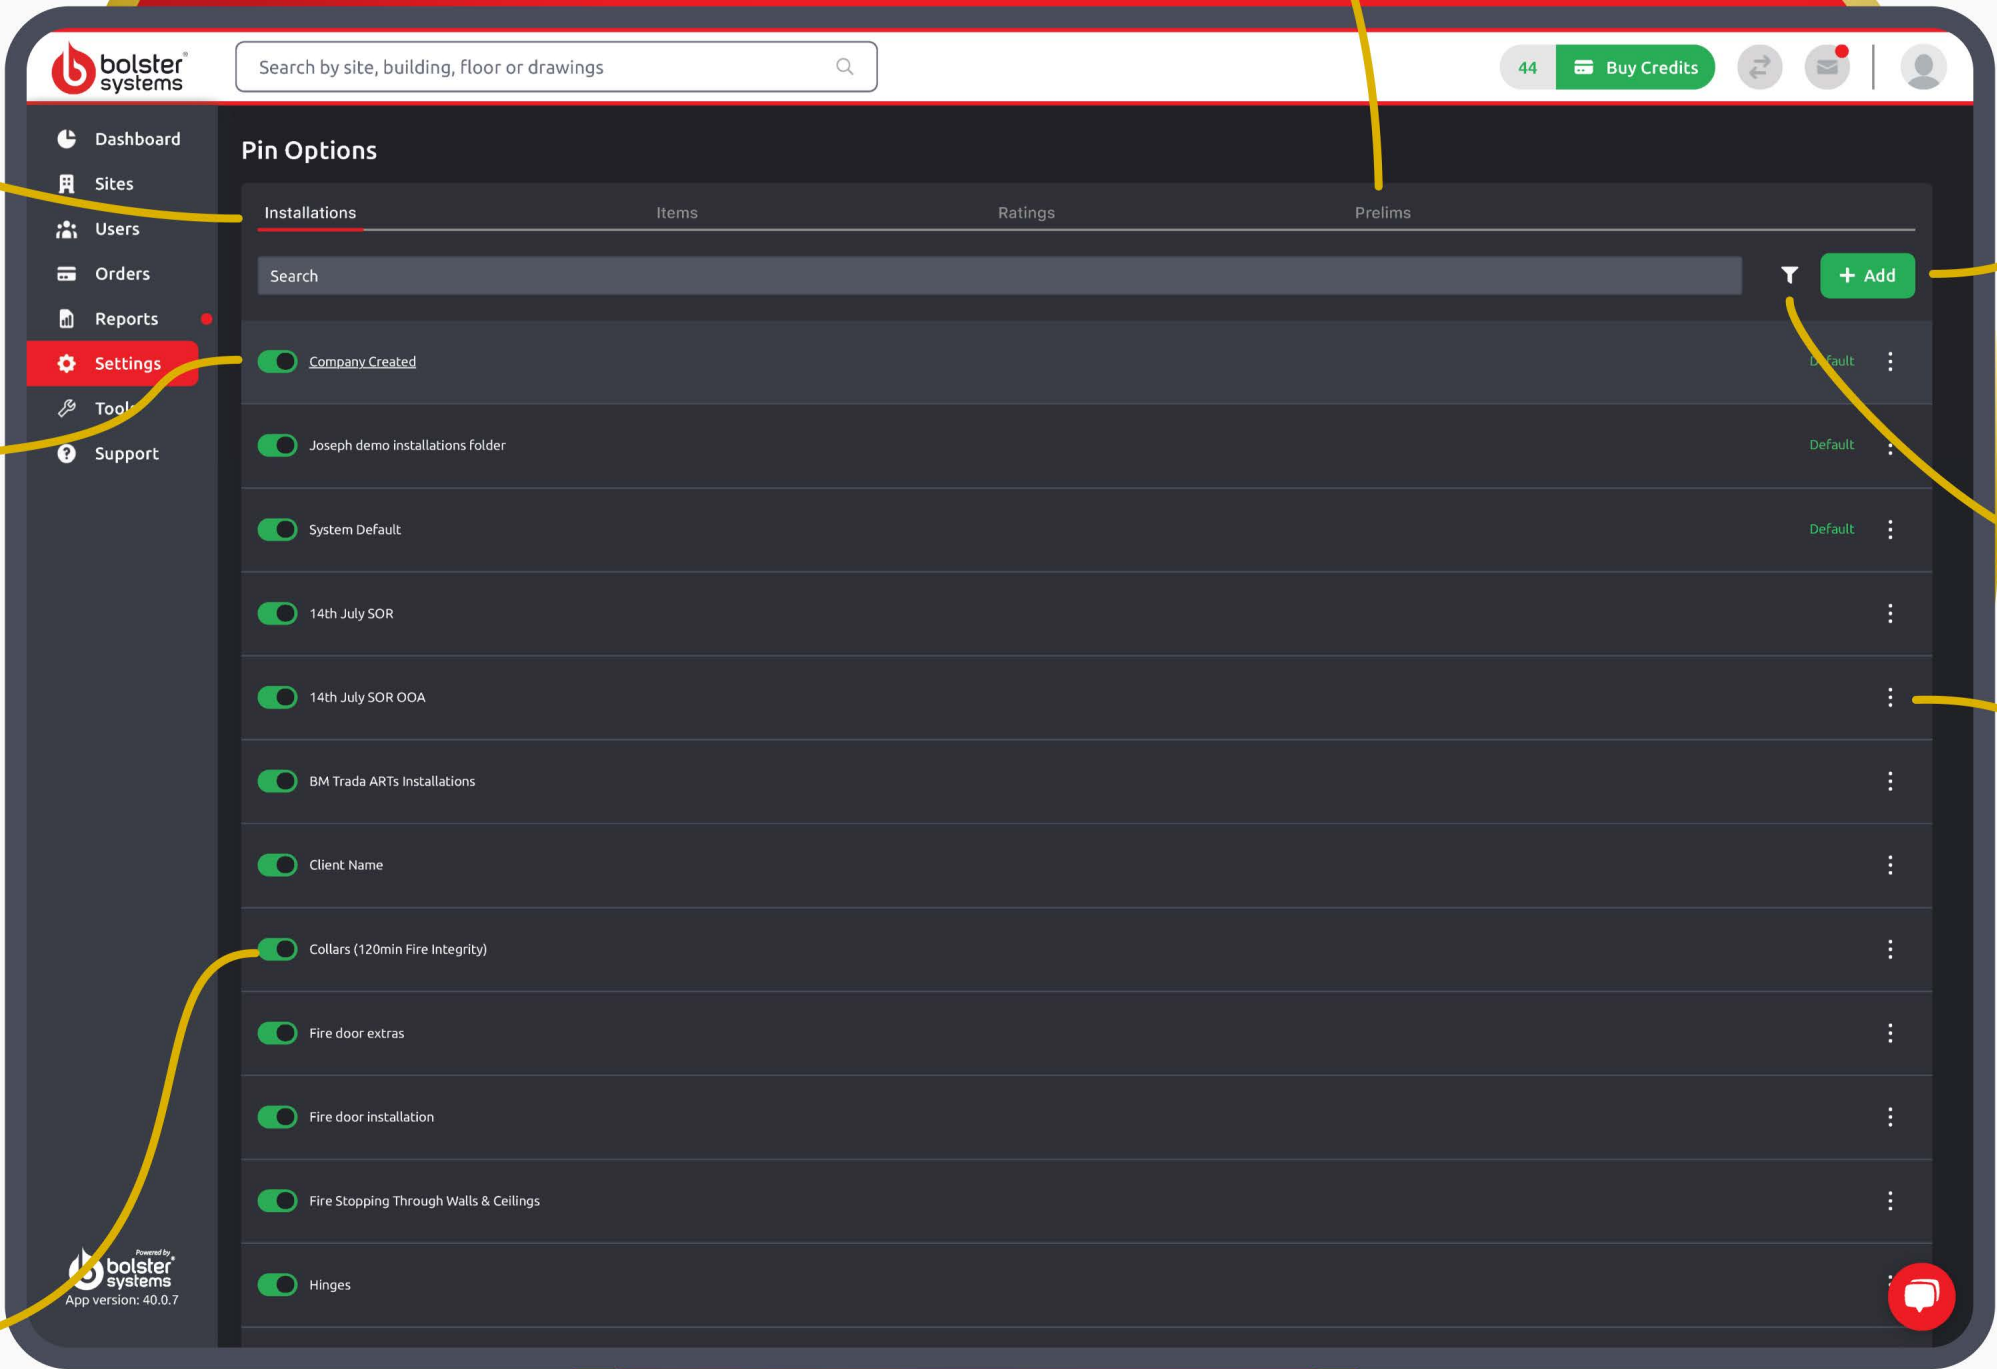

6 Enable and disable your folders here. Disabled folders will not show through the sites area when trying to attach to a site.

3 Add a new folder. Once you have named your folder you will be prompted to start creating your first installation type straight away.

5 Use filters to view your contents in the table by: Service, who created them, if they are enabled/disabled or hidden.

7 Expand your options using this 'kebab menu'. You can set a folder as a default to appear as pin options for every site and Duplicate, edit, merge and delete a folder.

Only user created folders can be deleted. If a Bolster Systems created default is cluttering your pin options area, you can choose to hide these folders.

Installations Folder

1 Installations table. Each row is a folder that contains your installation type pin options that will output to a template when added to a site. Click to enter your folder and add installation types.

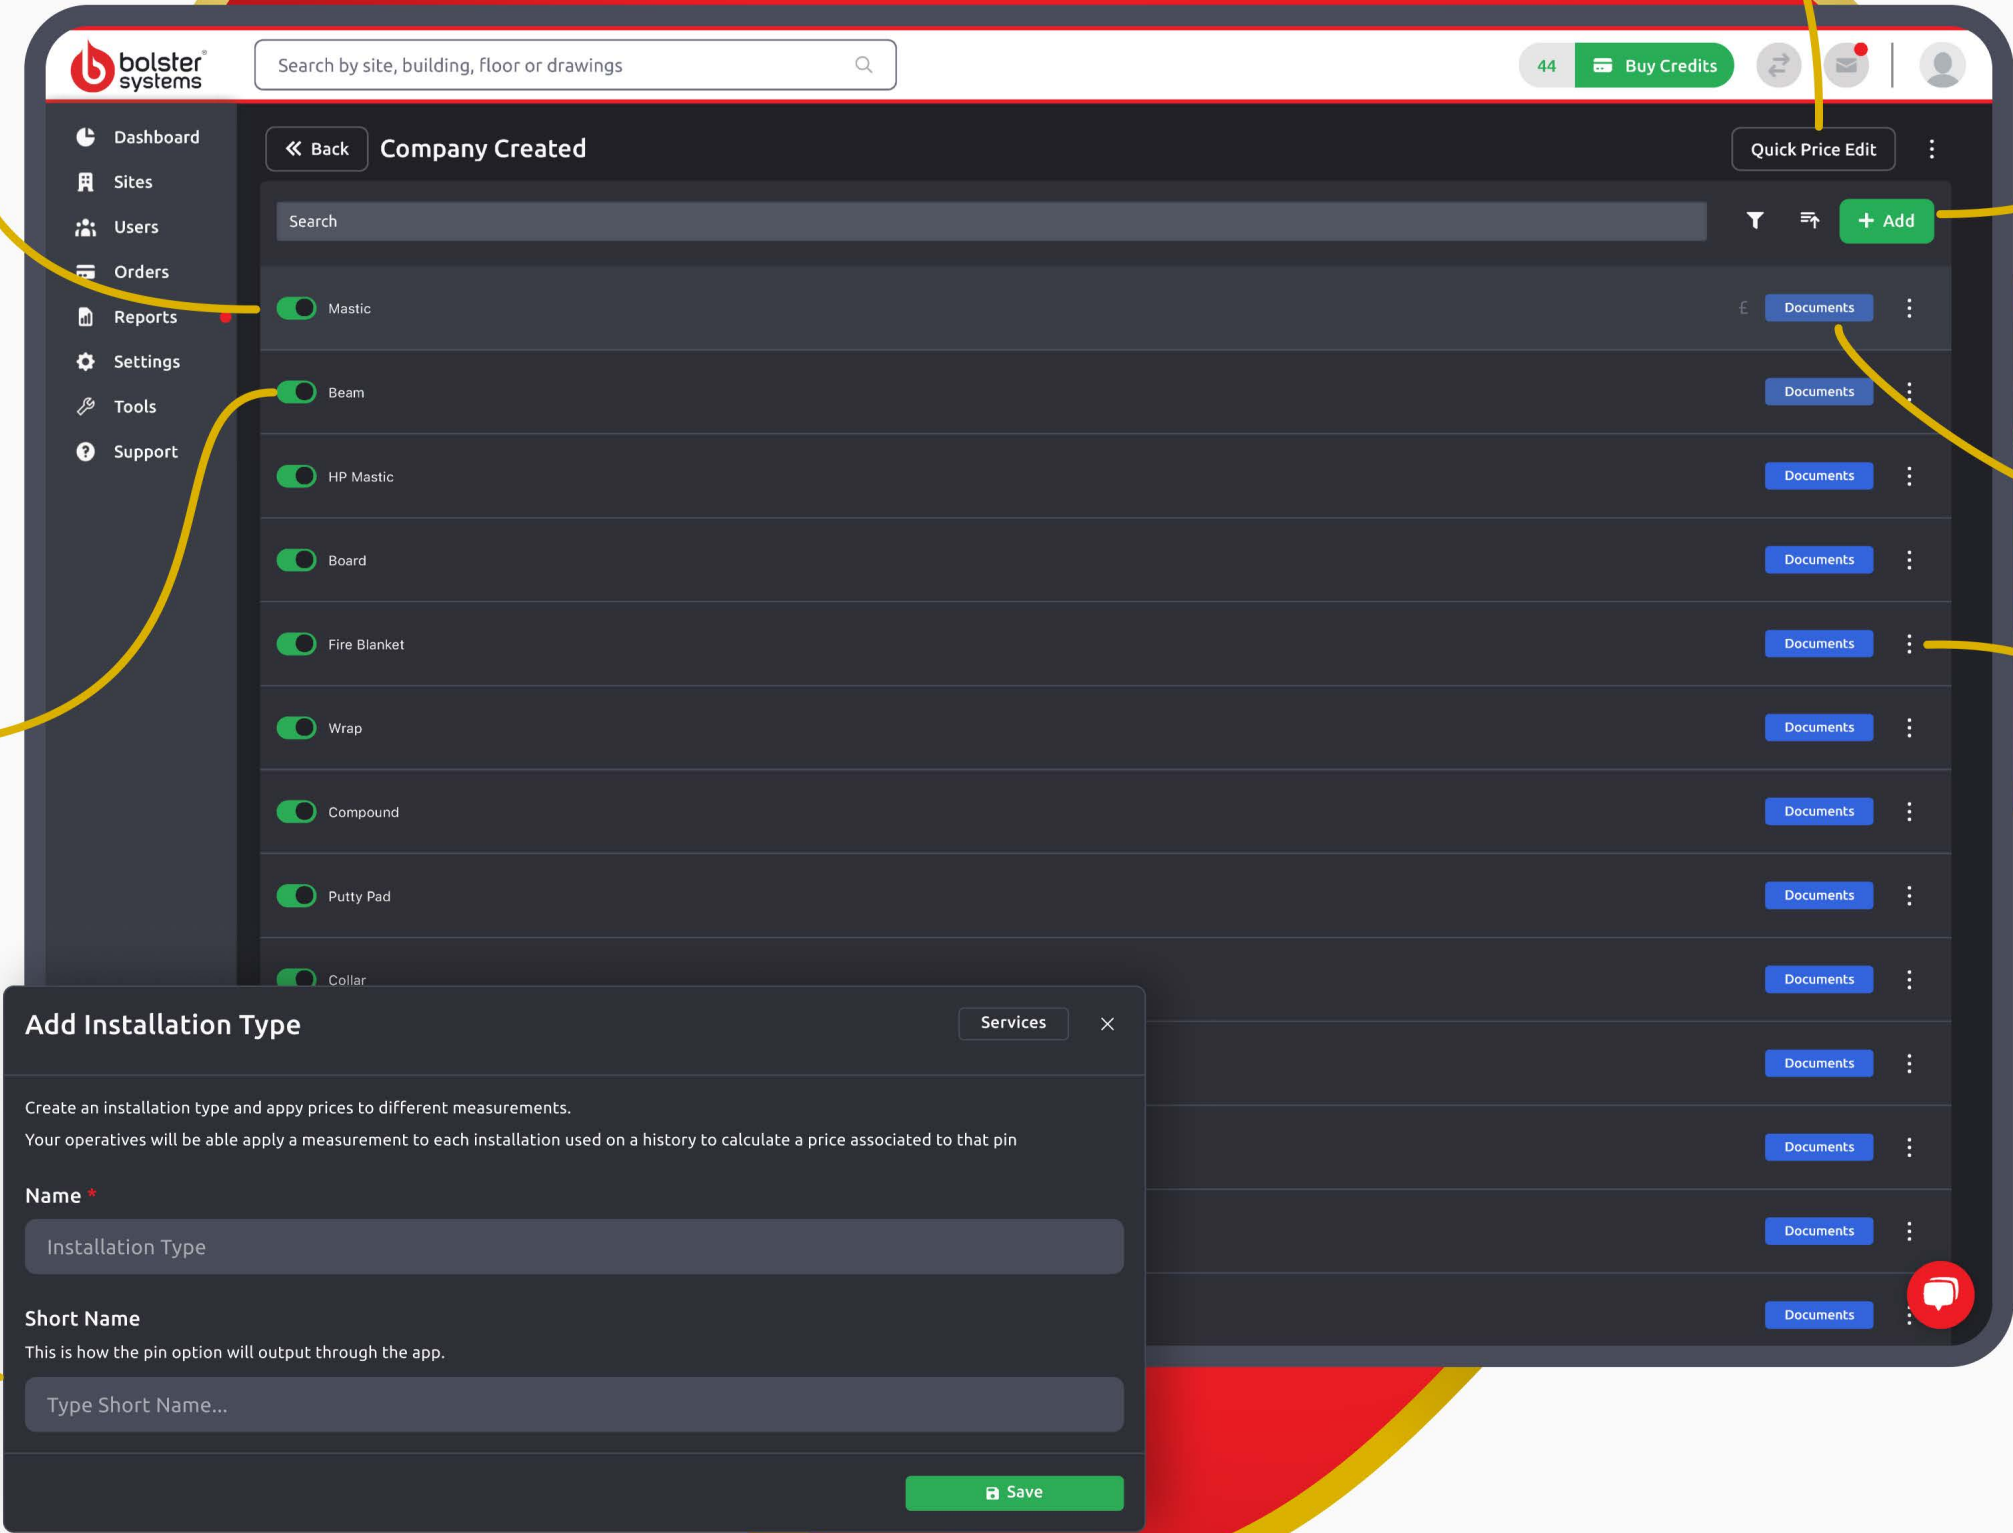

Any Bolster Systems default installation types will be in this folder named 'System Defaults'. Installation Types you have created previously will be in a folder named 'Company Created'.

4 Enable and disable your installation types here. Disabled installation types do not show in your pin options when answering a question, even if the folder is enabled and added to a site.

6 When adding or editing an installation type, this pop-up modal will appear. Choose the name of your installation type aswell as a new 'short name'. A short name is the name that appears through the app.

2 Use the quick price edit to increase or decrease all the prices in your folder by a percentage.

- 1 Installation Type
- 2 Quick Price Edit
- 3 Add Installation Type
- 4 Enable/Disable Installation Type
- 5 Documents
- 6 Installation Type Folder
- 7 'Kebab' menu

Pin Option Folders

As part of the Bolster Plus update, we have made changes to how pin options work and how item and installation types can be created, grouped and set against sites. You can now create folders of items, installations, and ratings. These groups can be duplicated, merged and set as default to ensure the correct options are available for selection when adding pin histories.

Creating a Pin Option Folder

1. From the left hand navigation menu, hover over “Settings” and select “Pin Options” from the pop out
2. From the tabs select the desired pin option type (Installations, Items, or Ratings)
3. Click the green “+ Add” button
4. On the following modal enter the desired folder name, select which service(s) this folder is required for. Note: If you only have one service this will be automatically selected
5. Click the green “Save” button

Note: Within each type of pin option, no two folders can have the same name.

Setting Pin Option Folder(s) as Default

1. From the left hand navigation menu, hover over “Settings” and select “Pin Options” from the pop out
2. From the tabs select the desired pin option type (Installations or Items)
3. Find the desired folder you would like to set as default
4. Click the kebab menu (three vertical dots) on the right hand side of the desired folder
5. From the pop-out menu click “set as default”

Notes:

You can have as many folders as you’d like as default, they will all be automatically applied to sites unless deselected.

To remove a folder as default follow this same process and click “Remove as default”.

Creating an Item Type or Rating

1. From the left hand navigation menu, hover over “Settings” and select “Pin Options” from the pop out
2. From the tabs select the desired pin option type (Installations or Items)
3. Select the desired folder
4. Click the green “Add” button
5. On the following modal enter the desired pin option name
6. The services set to the folder will be inherited but these can be edited if desired
7. Click the green “Save” button

Note: Users can only create pin options within user created folder. Any folders provided by Bolster Systems will need to be duplicated first. Please see page ...

Creating an Installation Type

1. From the left hand navigation menu, hover over “Settings” and select “Pin Options” from the pop out
2. From the tabs select “Installations”
3. Select the desired folder
4. Click the green “Add” button
5. On the following modal enter the desired pin option name. You can also enter an optional short name for operatives to see on the app.
6. The services set to the folder will be inherited but these can be edited if desired
7. Click the green “Save” button

Note: Users can only create pin options within user created folder. Any folders provided by Bolster Systems will need to be duplicated first. Please see page ...

Adding Documents to an Installation Type

1. From the left hand navigation menu, hover over “Settings” and select “Pin Options” from the pop out
2. From the tabs select “Installations”
3. Select the desired folder
4. Find the installation type you’d like to add documents to and click the blue “documents” button
5. Click the blue “upload” button
6. Select the desired document from your device and enter a name for the document
7. Click the blue “confirm” button

Note: Upload all documentation required for the product. This will give app users access through their device on site.

Moving a Pin Option From One Folder to Another

1. From the left hand navigation menu, hover over “Settings” and select “Pin Options” from the pop out
2. From the tabs select “Installations”
3. Select the desired folder
4. Find the pin option you’d like to move and click its kebab menu
5. From the pop-out menu click “Move”
6. On the following modal select the desired destination folder (this cannot be a Bolster System created folder) and rename the pin option if required
7. Click the blue “Confirm” button

Note: In each folder no two pin options can have the same name, check to make sure there isn’t already a pin option with the same name in the destination folder

Duplicate a Pin Option Folder

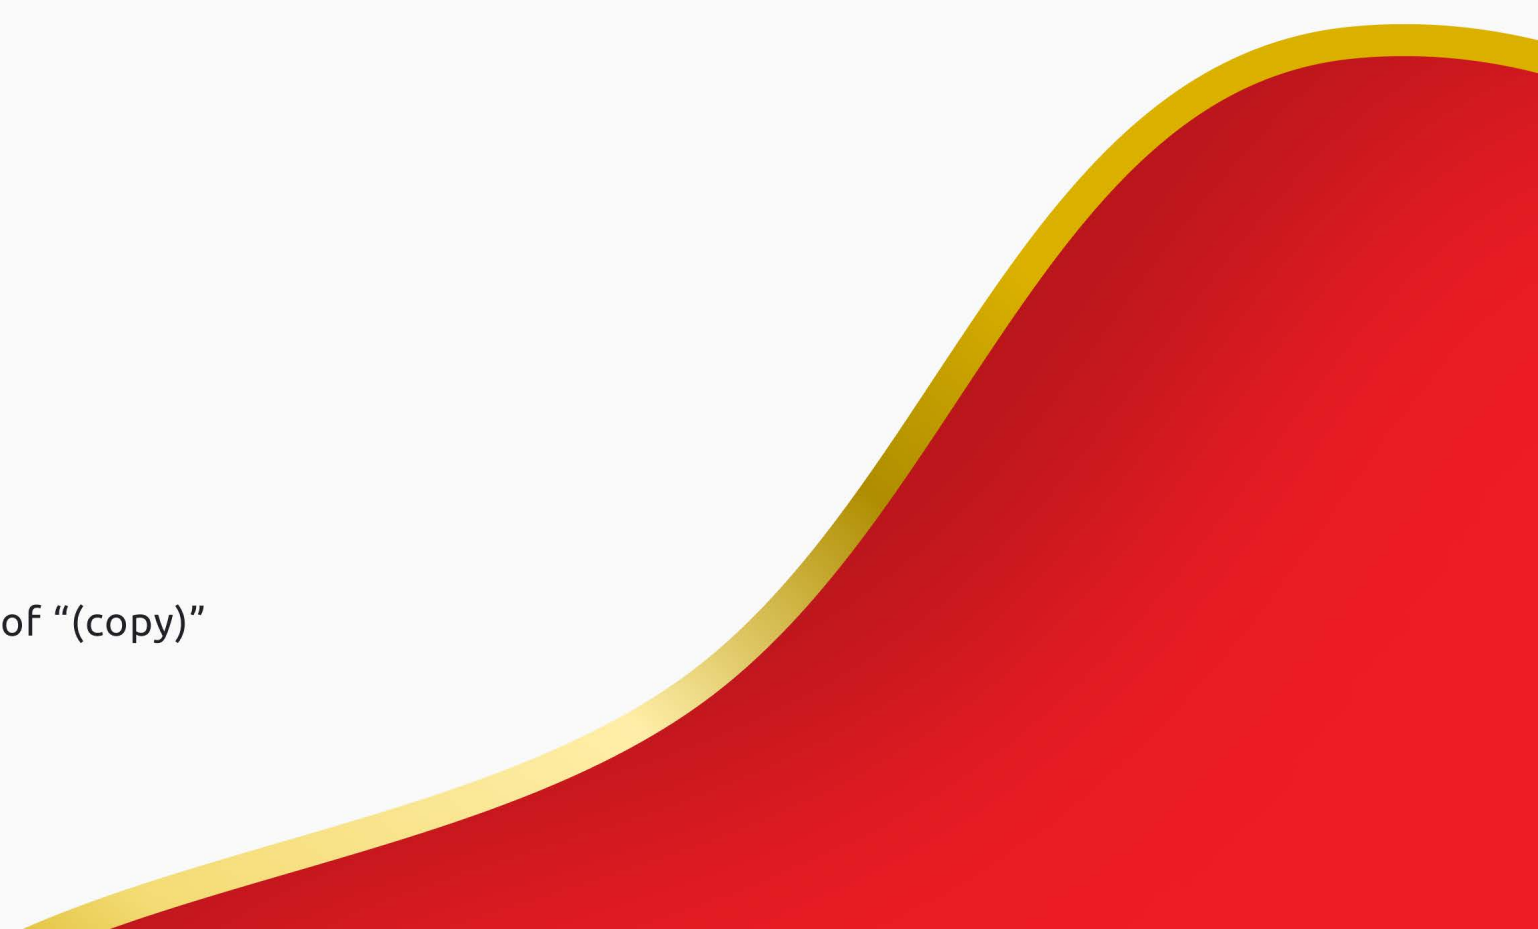

1. From the left hand navigation menu, hover over “Settings” and select “Pin Options” from the pop out
2. From the tabs select “Installations”
3. Find the folder you’d like to duplicate and click its kebab menu
4. From the pop-out menu click “Duplicate”
5. On the following modal rename the new folder
6. Click the blue “Confirm” button

Note: If the new folder is not renamed it will have the same name as the original folder with the edition of “(copy)”

Duplicate a Pin Option

1. From the left hand navigation menu, hover over “Settings” and select “Pin Options” from the pop out
2. From the tabs select “Installations”
3. Select the desired folder
4. Find the pin option you’d like to duplicate and click its kebab menu
5. From the pop-out menu click “Duplicate”
6. On the following modal rename the pin option
7. Click the blue “Confirm” button

Note: If the new pin option is not renamed it will have the same name as the original pin option with the edition of “(copy)”

Merge Pin Option Folders

1. From the left hand navigation menu, hover over “Settings” and select “Pin Options” from the pop out
2. From the tabs select the desired pin option type (Installations, Items, or Ratings)
3. Find the folder you’d like to merge and click its kebab menu
4. From the pop-out menu click “Merge”
5. On the following modal select the desired destination folder (you cannot merge Bolster Systems created folders)
6. Click the blue “Confirm” button

Note: In each folder no two pin options can have the same name, check to make sure none of the pin options have the same name as those in the destination folder.

Hide a Bolster Systems Created Folder

1. From the left hand navigation menu, hover over “Settings” and select “Pin Options” from the pop out
2. From the tabs select the desired pin option type (Installations, Items, or Ratings)
3. Find the desired Folder and click its kebab menu
4. From the pop-out click “Hide”

Note: To bring back a hidden folder filter to show hidden and follow the same steps as above but click “Unhide”

Hide a Bolster Systems Created Pin Option

1. From the left hand navigation menu, hover over “Settings” and select “Pin Options” from the pop out
2. From the tabs select the desired pin option type (Installations, Items, or Ratings)
3. Select the desired Folder
4. Find the desired pin option and click its kebab menu
5. From the pop-out click “Hide”

Note: To bring back a hidden folder filter to show hidden and follow the same steps as above but click “Unhide”

Delete a Folder

1. From the left hand navigation menu, hover over “Settings” and select “Pin Options” from the pop out
2. From the tabs select the desired pin option type (Installations, Items, or Ratings)
3. Find the desired Folder and click its kebab menu
4. From the pop-out click “Delete”
5. Click the blue “Confirm” button

Note: Deleted folders can be restored from the recently deleted area

Delete a Pin Option

1. From the left hand navigation menu, hover over “Settings” and select “Pin Options” from the pop out
2. From the tabs select the desired pin option type (Installations, Items, or Ratings)
3. Select the desired Folder
4. Find the desired pin option and click its kebab menu
5. From the pop-out click “Delete”
6. Click the blue “Confirm” button

Note: Deleted pin options can be restored from the recently deleted area

Site Creation

Setting Installation and Item Types for a Site

1. From the left hand navigation menu select “Sites”
2. Click the blue “Add” button
3. Enter the desired site details and toggle on “Set item types for site?” / “Set installation types for site?”
4. Your enabled item/installation folders will now be outputted. Select the desired folder(s)
5. Click the blue “Confirm” button

Note: Your default installation/item folder(s) will automatically be applied to sites if toggle is turned off

Editing Installation and Item Types for an Existing Site

1. From the left hand navigation menu select “Sites”
2. Locate the site you wish to edit and click the outlined “view” button
3. Click the outlined “Edit Pin Options” button
4. Toggle “set item types for site” / “set installation types for site?” and set/remove options as desired
5. Click the blue “Confirm” button

Note: Your default installation/item folder(s) will automatically be applied to sites if toggle is turned off

Setting Installation Type Documents to a New Site

1. From the left hand navigation menu select “Sites”
2. Click the blue “Add” button
3. Enter the desired site details and toggle on “Set Installation type documents for site?”
4. Your enabled item/installation folders will now be outputted. Select the desired folder(s)
5. Click the blue “Confirm” button

Note: Your default installation/item folder(s) will automatically be applied to sites if toggle is turned off

Editing Installation Type Documents to a New Site

- 1. From the left hand navigation menu select "Sites"
- 2. Locate the site you wish to edit and click the outlined "view" button
- 3. Click the outlined "Edit Pin Options" button
- 4. Toggle "Set Installation type documents for site?" and set/remove options as desired
- 5. Click the blue "Confirm" button

Note: Your default installation/item folder(s) will automatically be applied to sites if toggle is turned off
